

## Summary

The ATC-SCC04F module is a quad channel serial communication controller with 4K Fifo per Line. The ATC-SCC04F module is based on 4 enhanced Z85233, with larger FIFOs and several SDLC improvements from Zilog. This module provides four asynchronous ports up to 230 kbaud and synchronous ports up to 2 Mbaud full-duplex channels, with an independent baud rate generator for each channel. Several types of interface are supported by the ATC-SCC04F module: - RS-232 for the ATC-SCC04FA version and RS-422 / RS-485 for the ATC-SCC04FB version - TTL for the ATC-SCC-04FTTL version.
