

## LAB VIEW 8.0 DRIVERS, LIBRARIES AND VI TOOLS

### Summary

National Instruments LabVIEW is an industry-leading software tool for designing measurement, test and control systems. Since its introduction in 1986, engineers and scientists worldwide who have relied on NI LabVIEW graphical development for projects throughout the product design cycle have gained improved quality, shorter time to market, and greater engineering and manufacturing efficiency. By using the integrated LabVIEW environment to interface with real-world signals, analyze data for meaningful information, and share results, you can boost productivity throughout your company. LabVIEW has the flexibility of a programming language combined with built-in tools designed specifically for test, measurement, and control, you can create applications that range from simple temperature monitoring to sophisticated simulation and control systems. No matter your project, LabVIEW has the tools necessary to make you successful quickly.

### Supported Products

- CompactPCI I/O
- PCI & PMC I/O
- Industry Pack Carriers
- MIL-STD-1553
- TI C31& 6713B DSP I/O

### Ordering Information

- LabVIEW-8-BSP

**Alphi Technology Corporation**
